

SHEEP – LICKS 16%

(FOR RUMINANTS ONLY)

NUTRIENT ANALYSIS

Crude protein, minimum.....	16.00%
Crude fat, minimum.....	5.00%
Crude fiber, maximum.....	2.00%
Calcium (Ca), minimum	1.00%
Calcium (Ca), maximum	2.00%
Phosphorous (P), minimum	1.50%
Magnesium (Mg), minimum	2.00%
Potassium (K), minimum.....	4.50%
Sulfur (S), minimum20%
Zinc (Zn), minimum.....	1250 ppm
Iron (Fe), minimum.....	500 ppm
Manganese (Mn), minimum	1000 ppm
Cobalt (Co), minimum	15 ppm
Iodine (I), minimum	35 ppm
Selenium (Se), minimum.....	10 ppm
Vitamin A, minimum	130,000 Int. Units/Lb.
Vitamin D3, minimum.....	30,000 Int. Units/Lb.
Vitamin E, minimum.....	200 Int. Units/Lb.

INGREDIENTS

Beet molasses, Concentrated separator by-product, Hydrolyzed feather meal, Corn distillers grains, Hydrolyzed vegetable fat (preserved with Ethoxyquin), Monocalcium-dicalcium phosphate, Calcium carbonate, Potassium chloride, Zinc sulfate, Zinc oxide, Zinc proteinate, Ferrous sulfate, Manganous oxide, Manganese sulfate, Ethylenediamine dihydroiodide, Cobalt sulfate, Sodium selenite, Vitamin A acetate, Vitamin D supplement, Vitamin E supplement,, concentrated aspergillus oryzae, saccharomyces cervasiae fermentation culture), Diatomaceous Earth (anti-caking agent) added.

FEEDING DIRECTIONS

Feed one tub per 50 head of sheep. Additional tubs may be needed when there are smaller lambs with larger ewes. Place the tubs where sheep tend to congregate. Tubs should be fed continuously along with additional forages and water. If additional mineral or vitamins are desired, offer a loose sheep mineral free choice.

IMPORTANT

Consumption of Sheep Licks will vary depending on quality feed and availability of other feeds. Sheep conditions and weather conditions will also affect consumption.

INTRODUCTION PERIOD

During the introduction period, tubs should be placed approximately 50 to 75 feet near the area that sheep congregate. Move tubs to accommodate consumption, if consumption is less than expected, move tubs nearer to the area that sheep congregate. If consumption is more than expected move tubs further from congregational area. Additional feed may be necessary if consumption becomes excessive. DO NOT PROVIDE TUBS TO SHEEP OF POOR CONDITION WITHOUT PROVIDING SUPPLEMENTAL FEED. IF CONSUMPTION IS EXCESSIVE FOR MORE THAN TWO WEEKS REEVALUATE THE TOTAL FEEDING PROGRAM.

DISCLAIMER: TUBLICKS WILL NOT BE RESPONSIBLE FOR THE LOSS OF ANIMALS DUE TO MIS-MANAGEMENT OF HERD CARE.

Manufactured by:

149 RR Ave | Wyndmere, ND 58081 | www.tublicks.com

This product was made in a feed manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feed.
